Count of Transaction ID by Journey Status and Refund Request

Revenue grows when we focus on **peak pricing and online sales**

Delays are the biggest problem; fixing them improves everything

Customers prefer **fast, digital payments and online booking**

Refunds are caused by delays and cancellations

If we reduce disruptions, we:

- Increase revenue
 - Improve efficiency
 - Make customers happier
-
- Better pricing and more online booking will increase revenue
 - Better planning and fewer delays will ensure smooth operations and less disruptions
 - Easier and faster booking services will enhance customer satisfaction and loyalty
 - Fewer delays and lower refunds will increase profits

RECOMMENDATIONS

Reducing delays:

- fix technical issues faster
- monitor high risk rates closely
- use weather alert for planning
- add backup trains during peak times

Optimizing pricing

- Increase prices slightly during peak hours
- Reward early booking
- Use dynamic pricing(price changes based on demand)
- offer discounts during low demand and times

Reduce refund Rates

- Reduce delays and cancellations
- Improve communications when issues happen
- Offer rescheduling instead of refunds
- Fix problems routes quickly

Increase online purchases

- Promote online banking with discounts
- Make payment methods easier and faster
- Focus on mobile friendly booking
- Push digital payment options

Improve Customer Satisfaction

- Reduce delays and waiting time
- Provide real time updates
- Improve booking experience
- Ensure smooth travel
